DG Frondorf and Associates, LLC Celebrates Ten Years in Business
Consistent Expansion Fuels Solid Business Growth

Cincinnati, OH – DG Frondorf and Associates, LLC, (DGFA) a Cincinnati-based estimating company, is celebrating its tenth anniversary.

Daniel Frondorf, CPE, founder and chief estimator, started DGFA in 1999, filling a void he saw in the construction industry: a dedicated resource that helped local construction companies with their estimating needs. From that one-man business, DGFA has grown to five employees and has clients throughout the United States that include design firms and construction management firms with complex estimating needs.

In addition to providing clients with standard estimating services, the DGFA team offers a unique breadth of services, including:

- High-tech estimating accuracy. DGFA uses the latest in estimating hardware and software, providing a high level of technical expertise to all projects which many companies don't use on in-house estimating projects.
- On-site Certified Professional Estimator. Frondorf became a CPE in 2008, one of only 650 in the United States.
- Education and training sessions. The team now helps others learn the estimating business, teaching others the tools of the estimating trade.
- Certification. LEED certification is next on the list of accomplishments that the DGFA team will offer to its clients.
- Industry leadership and involvement. Frondorf and other team members are not only members of industry associations, including the American Society of Professional Estimators (ASPE) and the Allied Construction Industries (ACI), but are leaders and active members as well.

"DGFA continues to evolve along with the construction industry, providing services that serious-minded construction industry firms, from design firms to contractors, need to be successful for the long-term," stated Daniel G. Frondorf, president and founder of DGFA. "We continue to increase our scope of services, keep abreast of industry trends and reach out to the marketplace. Adding value to our clients' projects beyond simply providing project-specific information keeps them returning to us, and gives us a solid, loyal client base."

About DG Frondorf and Associates, LLC (DGFA)

DG Frondorf and Associates is the premier estimating company serving the civil and sitework construction trades in the Greater Cincinnati area. DGFA works with contractors, designers, owners, developers and construction managers providing project-specific data and construction budgeting. DG Frondorf and Associates was established in 1999.
